ABOUT ME

Results-oriented Full Stack Developer with 3+ years' experience, primarily in freelance and remote roles, building scalable web and mobile solutions. Adept at delivering robust applications from concept to deployment. Skilled at collaborating with cross-functional teams and stakeholders to translate business needs into functional, user-friendly tech solutions. Recently completed an intensive bootcamp (CareerFoundry), bringing a strong foundation in modern full stack technologies and agile practices.

EXPERIENCE

FREELANCE FULL STACK DEVELOPER
VARIOUS CLIENTS (REMOTE) | 2022 – PRESENT

NOTABLE PROJECTS & CLIENTS:

Novel Health (EMR System):

Lead developer and maintainer for a React/Node.js electronic medical record (EMR) platform, handling ongoing upgrades, bug fixes, and feature additions for healthcare operations.

Parallel Addictions:

Developed and maintained an event ticketing website; implemented online ticket sales and client support for event management.

Excaf Gambia | 2020 – 2021

- Oversaw all IT functions and digital infrastructure for the organization.
- Developed, managed, and maintained the company website (Java, HTML, CSS).
- Led routine maintenance, troubleshooting, and feature upgrades for the main web platform.

Services Plus Gambia (now Aerologic Tech):

Designed, developed, and continue to maintain the company's service website; integrated sales modules and supported digital transformation for business operations.

Key Contributions:

- Manage full project lifecycle, from requirements gathering to deployment and maintenance.
- Collaborate with international clients to deliver tailored web solutions.
- Ensure reliable, scalable platforms for diverse industries including health tech and events.
